1. Important safeguards

When using electrical appliances, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following:

Read all instructions before using this bidet

DANGER - To protect against electric shock:

1. DO NOT splash water or urine onto the bidet or heated seat.
2. DO NOT immerse the bidet and/or cord, plug or appliance in water or other liquid.
3. DO NOT place or store the bidet where it can fall or be fallen into water.

WARNING - To protect against the risk of burns, fire, or injury to persons:

1. This bidet is intended for household use only.
2. DO NOT operate the bidet with a damaged cord or plug, or after the appliance malfunctions, or has been dropped or damaged in any manner.
3. To unplug with unit switched off, grip the plug and pull out from the wall outlet. Never pull on the cord.
4. DO NOT use this bidet for other than intended use. Improper use of the unit may result in breakage or damage.
5. If electric circuit is overloaded with other appliances, your bidet may not operate properly. It should be operated on a separate electrical circuit from other operating appliances.
6. In order to reduce the risk of electric shock, the plug has to fit fully in the outlet. If it does not fit then contact a qualified electrician. DO NOT attempt to defeat this safety feature.
7. The maximum permissible inlet water pressure : $0.5\text{kgf/cm}^2 \sim 7.5\text{kgf/cm}^2$
8. Type Y attachment : If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or other similarly qualified persons in order to avoid a hazard. The socket-outlet shall be installed near the bidet and shall be easily accessible.

Save these instructions

2. Things to know before your first use

1. Carefully unpack the bidet and remove all packaging materials. To remove any dust that may have accumulated during packaging, wipe with a damp cloth. DO NOT use harsh or abrasive cleaners on any part of the bidet.
2. The bidet will not fit some one-piece toilet so please check dimensions carefully for proper installation.
3. DO NOT install in a location where water might be splashed onto the bidet or exposed to such excessive moisture that condensation forms on the bidet's surface.
4. The bidet must be grounded. Connect only to properly grounded outlet.
5. Supplied water pressure shall be maintained within the range of $0.5\text{kgf/cm}^2 \sim 7.5\text{kgf/cm}^2$.
6. Keep the water hoses warm when and where water freezes in hoses. If the water frozen in the hoses in winter season, warm the units inside the room before installation.
7. Plug the bidet into a AC 230-240V~ 50Hz outlet.
8. Supply electrical power to the bidet only when the plumbing installation work has finished. Otherwise, it can cause malfunction.

1) **Warnings in operating** (Follow the instructions below for your safety)

A number of signs shown herein helps you to be more safe in operating and use with a good manner so that any injury or damage or loss not happened.

Read this Instructions & operating guide carefully before installation and operation of this bidet, and keep this at the place whoever can find and read easily.

	Warning	If the followings disregarded or mis-treated, person using the bidet might be dead or heavily injured.
	Caution	If the followings disregarded or mis-treated, person might be injured or property might became a loss.

* The signs below explain what the bidet user to do.

	Must follow
	Prohibited

 Warning		
 Must follow	<p>Be careful about a burn at a low-temperature. It may happen even lower than 40 °C.</p> <p>* As a user shown below intends to use heated seat or warm air dry, his/her aroundone turns seat heating off and sets AIR to lower level.</p> <ul style="list-style-type: none"> - children or the aged who can hardly adjust temperature by oneself as wish. - a patient or a physically handicapped who is easily immovable. - someone took a slumberous pill or a cold remedy, or excessively drunken, an exerted so that he or she can fall easily into deep sleep. <p>* Turn off the heated seat when someone sits on the seat for a while.</p>	
	<p>Provide adequate ventilation by opening a window in order to avoid damage to electronic components if the bidet placed in such humid bathroom. Otherwise, it can cause fire or electric shock.</p>	
	<p>Use a three wire grounding outlet all the times, and install a ground fault interrupter on the circuit supplying power to the bidet. Otherwise, it may cause electrical shock, fire, personal injury or damage to the bidet. If it is without a ground, then contact an electrician nearer.</p>	 <p>A ground (An earth)</p>
	<p>When it comes to clean the bidet, be sure to extract the plug from the outlet. It may cause electric shock.</p>	 <p>To extract the plug</p>
 Prohibited	<p>DO NOT touch the plug when hands get wet. It may cause electric shock.</p>	
	<p>DO NOT splash water or a detergent on the bidet or heated seat or plug. It may cause fire or electric shock.</p>	

Warning

 Prohibited	DO NOT insert a finger or any object into a hole which warm air comes out. It may cause fire or electric shock.	
	DO NOT ever try to dismantle or mend or reconstruct. It may cause electric shock. If a power supply cord has to be replaced, contact a dealer the bidet sold by all means.	 No dismantling !
	DO NOT pull out the plug by force. It may cause fire.	
	<ul style="list-style-type: none"> - DO NOT insert a plug in an outlet which out-numbered already in. It may cause fire. - DO NOT insert a plug in an outlet which is loose, tossed and rolled. It may cause fire. Retighten the mounting nuts and bolts as necessary. - DO NOT keep using an outlet which dust and dirt accumulated on. It may cause fire.	
	DO NOT connect the water supply valve to water line of waste water or industrial water. It may cause inflammation.	

Caution

 Prohibited	DO NOT put the bidet' plug in to the outlet together with a plug of toilet light or ventilation. It may go wrong with a bidet nozzle. (It is because when turn a toilet light or a ventilation on then off, or turn off and turn on, the nozzle may move consequently each time. Furthermore, when a toilet light or a ventilation is off, the bidet does not function well.)	
	DO NOT fold or damage the connecting flexible hose. It may cause a leakage of water.	
	DO NOT foot on the seat cover or main body as a footstool or place heavy objects on the bidet. It may cause damage.	
	DO NOT allow a burning cigarette or any flammables to close to the bidet. It may cause fire or deformation or discoloration.	
	DO NOT use a toilet detergent, benzene, thinner, cleanser or abrasive cleaners to clean the bidet. It may scratch or flaw the surface of the bidet.	

Caution

Must follow

- If the bidet is not used for many hours, pull out the plug and turn off the water pipe valve. When the bidet is used afresh, plug in and discharge water inside the water tank, then operate. It may cause inflammation due to water change in quality.
- In case water leaks out, turn off the water supply valve.
- If a filter is adopted, change it periodically since the filter is a consumable part. Otherwise the filter will be contaminated and it may inflame. If the filter is blocked, water pressure may become weak while cleansing.

2) **Cautions in operating** (Follow the instructions below for your safety)

Do not expose the bidet into direct sunlight. It may cause deformation or discoloration.

Do not lean against seat cover while seated. Seat cover may be broken down or cracked apart.

Do not splash urine on the nozzle or a hole of warm air dry. It may cause out of order.

Do not apply force to the nozzle to push it back though it does not move owing to a power cut. It may cause out of order. The nozzle will automatically return back to original position when a power resumed.

Pull the plug out in case of thunder or lightning. It may cause out of order.

Do not open or uncover the seat and seat cover by force. It may cause out of order.

Do not press any buttons by force. It may cause out of order.

Keep the ambient temperature not below than 0 °C inside the toilet. Water may leak owing to freezing burst.

3. Product introduction

1) Main unit

2) Control panel

3) Accessories

4. Operation

Check point prior to operation

Check whether the water pipe valve is opened completely or not.

If it is closed, open as shown in the picture.

Check whether the power plug is put in the outlet or not.

If it is not, plug in closely.

Check whether the warm water tank is filled with water or not.

If not, water does not spray out even a switch is pressed.

This is not a defect but a temporary phenomenon when used in the beginning right after installation.

* How to fill the water tank with water

- Hide the user sensor with a paper to make the sensor work.
 - Hide the nozzle when it came out frontward after pressing the WASH button.
 - When water comes out from the nozzle, press the STOP button since the warm water tank is filled up with water.
- The nozzle does not work if user sensor is not covered.

* Pay attention not to get wet by water coming out if the nozzle is not covered by hands.

How to operate

1. User sensor

Sit on the seat.

If nobody seated on, it doesn't work at all even a switch is pressed since the user sensor adopted.

2. Deodorization (option)

Press the DEODORIZATION button.

Then DEODORIZATION lamp is on and it works. It diminishes stink while evacuating. Then it stops automatically after 10 minutes. If it is necessary to stop, just press the switch once more.

3. Cleansing

Press the WASH button when rear cleansing is needed.
Press the BIDET button for front cleansing for ladies.
Then its lamp lights up and cleanse the regions.

Press the MOVE button when the wider region needs to be cleansed.
The cleansing nozzle moves frontward and backward for cleansing.

- * If the MOVE button is pressed again, the move function stops.
- * The MOVE functions only in the middle of cleanse or bidet functioning.

Press ◀ (forward) or ▶ (backward) of the NOZZLE button in case the cleansing position needs to be adjusted.

The nozzle moves forward or backward to meet required position.

- * The cleansing position can only be adjusted in between the regular area.
So that it can not be adjusted more after it reaches at its maximum.

In case repeated strong and weak cleansing is needed, press the MASSAGE button.

The water pressure becomes strong and weak over and over, and cleanse.

- * If the MASSAGE button is pressed again, the MASSAGE function stops.
- * The MASSAGE functions only in the middle of cleanse or bidet functioning.

If water pressure in cleansing needs to be adjusted, press ◀ (forward) or ▶ (backward) of the WATER / AIR button. It is adjustable in five levels.

Press the STOP or DRY button after cleansing, then cleansing function stops.

If the STOP button is not pressed for a long time, it will stop automatically about 3 minutes later.

4. Dry

Press the DRY button.

Then its lamp lights up and warm air blows out to dry.

Press ◀ or ▶ button of the WATER / AIR in order to adjust warm air temperature.

The temperature changes in five levels. (constant temperature, 45 °C ~ 65 °C)

◀ higher, ▶ lower

- * The temperature of warm air can only be adjusted during warm air drying.
- * The temperature of warm air may be differentiated by surrounding temperature or voltage condition.

Press the STOP button after drying.

- * If the STOP button is not pressed for a long time, it will stop automatically about 5 minutes later.

5. Auto

The AUTO button is pressed, then it cleanses, dries and stops in a row.

If automatic rear cleansing is needed, press the AUTO button.

After rear cleansing by MOVE function for 40 sec. is finished, the DRY functions for 2 minutes automatically, then it stops.

If automatic bidet (front cleansing) is needed, press the AUTO and BIDET button successively. (in 2 seconds.)

After front cleansing by MOVE function for 40 sec. is finished, the DRY functions for 2 minutes automatically, then it stops.

6. A way to adjust the temperature of warm water & heated seat

Press the WATER TEMP. or SEAT TEMP..

Its lamps light up and those colors change and the temperatures vary.

- * Each lamp colors when its temperatures adjusted are as shown below.
Set the temperature to appropriate level to use the bidet more comfortably.

lamp color	off	green	yellow	red
temperature	normal temp.	30℃	35℃	41℃
	mainly used in summer	used in spring, fall		mainly in winter

- * In case warm water is fully used, the temperature goes down.
This is not out of order but a temporary phenomenon.

6. A way to use proper power saving

Power can be economized if the POWER SAVING button is pressed as follows.

- * If the POWER SAVING button is pressed in the middle of the night when the bidet seldom used, its lamp lights up and the water heater and the seat heater put off. Then all the functions return automatically back to its own state as it was about 6 hours later.

- * sample (power saving performance)

- * If the power saving function is not needed, press the POWER SAVING button again, then its lamp off and the function stops.
- * Though in the middle of the POWER SAVING is on, WASH, AUTO, BIDET, DRY, DEODORIZATION are available.

5. Cleaning instructions

1) Main unit

 <p>Warning</p>	<ul style="list-style-type: none"> * Extract the plug from the outlet without fail when it comes to clean the bidet. It may cause electric shock. * Do not touch the plug when hands get wet. It may cause electric shock. * Do not splash water or a detergent on the main unit or plug. It may cause fire or electric shock. 	
 <p>Caution</p>	<ul style="list-style-type: none"> * Do not use a toilet detergent, benzene, thinner, cleanser or abrasive cleaners in case of the bidet cleaning. It may scratch or flaw the surface of the bidet. * Pay attention not to make any scratch on the user sensor window. It may cause out of order. * In case a toilet detergent or antiseptic is used to clean inside the toilet, leave the seat cover opened. If evaporation gas go into the main unit, it may reduce durability or cause out of order. * Do not fold or damage the connecting flexible hose. It may cause water leakage. 	
<p>* Since almost the whole parts of the bidet are made of plastic, pay attention not to make a scratch while cleaning in accordance with the following instructions.</p> <ul style="list-style-type: none"> - Wipe with dry soft cloth. - In case it is stained a large quantity of filth, smear a neutral detergent on soft cloth after diluting with water and wipe. Then wipe with dry soft cloth once more. - If the main unit of the bidet is stained with a detergent or antiseptic used for cleaning unwillingly, then wipe clean afresh with dry soft cloth. <p>* If it is necessary to clean the main unit of the bidet and an opening between the bidet and the toilet, follow below instructions after separating the bidet from the toilet for convenience.</p> <p>- <u>How to separate</u> : Hold the both sides of the main unit by hands, and lift front side slightly, then pull ahead.</p> <p> Caution</p> <p>Pay attention not to fold or damage the connecting flexible hose. It may cause a leakage of water.</p> <p>- <u>How to combine</u> : Hold the both sides of the main unit by hands, and lift front side slightly, then pull it ahead.</p> <p>* In case the main unit and an opening between the bidet and the toilet to be cleaned, follow below instructions after separating the seat cover for convenience.</p>		 <p>wipe with dry soft cloth.</p> <p>hold the both sides by hands, and lift front side slightly.</p>  <p>pull the main unit ahead</p>  <p>base plate main unit</p>

How to separate the seat cover

As shown in the photo, hold the left hand side of the cover by hands, and lift slightly, then pull ahead.

How to combine

As shown in the photo, combine a pin on right hand side of the seat cover first, then combine the left pin holding the left hand side of the cover by a hand.

2) Nozzle

* In case dirt on the nozzle to be washed off, press ◀ (forward) and ▶ (backward) of the NOZZLE button concurrently, then the nozzle comes out without water spraying. Clean the nozzle at this time.

Use wet soft cloth in cleaning. In case it is stained a large quantity of filth, smear a neutral detergent after diluting with water on a soft brush and wipe. Then clean with water.

After cleaning is finished, press the STOP button
The nozzle returns back to its original position.

Caution

Do not apply force to the nozzle to push or pull. It may cause out of order.

3) Strainer

* If the strainer is blocked, water pressure may become weaker while cleansing or BIDET functions.
It is recommended to clean the strainer occasionally in accordance with procedures below.

As shown in the photo, turn the water supply valve to the right to close, then push the handle inside the water tank off completely.

Turn the nut of the connecting flexible hose at main body to left to separate the connecting flexible hose. Then, take the strainer out from water supply hole.

Clean the strainer by using a soft toothbrush.

Insert the strainer into the water supply hole and connect to the connecting flexible hose.

Turn the water supply valve to left to open for water supplying.

6. Check list before calling for service

* When it seems like out of order, check the followings before calling for service.

Still it does not work properly, pull out the plug and contact to authorized dealer for repair or replacement.

 Warning	<p>* Never try to dismantle or mend or modify. It may cause fire or electric shock.</p>	 No dismantling !
 Caution	<p>* In case a leakage of water, fasten the water supply valve to stop.</p>	 water supply valve close

Problem	Cause	Remedy
Overall functions are not working.	A power failure occurred.	Wait until the power is restored.
	The power cord is disconnected.	Insert the power into a power outlet. (see page 8)
The water pressure is low.	The water supply valve is not opened fully.	Open the water supply valve entirely.
	The strainer is blocked.	Clean the strainer. (see page 12)
	The water pressure adjustment is set to low.	Press  button. (see page 9)
	The water filter is blocked. (In case a filter is adopted)	Change the filter. (see page 15)
WASH or DRY does not function.	The seat sensor is not covered.	Sit closer to the seat sensor to make it work. (see page 8)
The water is cold.	The water temperature adjustment is set to low.	Adjust water temperature. (see page 10)
	The warm water is used for a long time.	Stop WASH and wait for approx. 5 mins.
	POWER SAVING button is pressed.	Press the POWER SAVING button once more to off. (see page 10)
The dryer temperature is low.	The dryer temperature adjustment is set to low.	Adjust warm dryer temperature by pressing AIR button. (see page 9)
The seat doesn't get warm.	The seat temperature adjustment is set to low.	Adjust seat temperature by pressing SEAT TEMP. button. (see page 10)
	POWER SAVING button is pressed.	Press POWER SAVING once more to off. (see page 10)

◆ The symptoms below are not out of order.

- The water doesn't come out even WASH or BIDET button is pressed right after installation.
 - > It is because the water tank is not full. In this case, press WASH or BIDET and wait about 1 minute.
 - Then inside the water tank is filled with water and water is sprayed at the same time.
- It sounds strange like "ooong-" or "shi-i-I" while using.
 - > It sounds when a pump or a nozzle motor or a deodorization motor works or when water comes out.
- The water temperature falls after a quantity of warm water used.
 - > It happens if almost warm water inside the water tank is used, but it happens only temporarily.

- Thanks to adopting soft close function, the seat and cover fall smoothly and slowly. Due to changes in room temperature or the frequency of the bidet, the speed of the lid closure may vary. This is not a malfunction. In addition, due to the added weight of the cover, the seat and lid close much faster. This is not a malfunction.
- Though water comes out around from the nozzle while "WASH" or "BIDET" works, it is not out of order but just for cleaning the nozzle automatically.

Self diagnosis function

When it got out of order, it is automatically indicated as below.

If it is in need of repair by reason of below cause, inform the indicated details as well.

Problem	Indication (WATER TEMP. adjustment lamp lighting)		Symptoms
Float sensor switch is disconnected.		WATER TEMP. lamp flickers in green.	The warm water is not sprayed.
Water temperature sensor is disconnected.		WATER TEMP. lamp flickers in yellow.	WASH, BIDET and AUTO do not work properly.
Warm water temperature sensor' short-circuit		WATER TEMP. lamp flickers in red.	
Seat temperature sensor is disconnected.		SEAT TEMP. lamp flickers in yellow.	The seat is not warm.
Seat temperature sensor' short-circuit		SEAT TEMP. lamp flickers in red.	

7. How to change the water filter

(RB670 model only)

Caution

- The water filter is a consumable part, and required to be replaced regularly (once in 6 months)
If the filter is contaminated, it may cause an inflammation.
If the filter is blocked then water pressure during cleansing may get weak.
- It is strongly recommended to use Royal TOTO's original water filter. In case it is not followed, and any harm or damages happened to body or property, Royal TOTO shall be under no obligation.

■ When the water filter is to be replaced, refer to below procedure.

- Turn the water supply valve to right hand side to close, and push the water tank handle. Then make the tank empty completely.
- Turn the connecting flexible hose of the main body to left to disconnect, and turn the water filter also to left to disconnect.

- Firstly connect the new water filter to the branching valve, then loosen (open) the water supply valve to remove any foreign bodies inside.

- Connect the flexible hose of the main body, then loosen(open) the water supply valve completely.

Warning

No dismantling !

- DO NOT ever try to dismantle or mend or reconstruct. It may cause electric shock.
- If a power supply cord has to be replaced, contact a dealer the bidet sold by all means.

Limited Warranty

One Year Limited Warranty

- 1) ROYAL TOTO CO., LTD. ("Royal") warrants its products to be free from manufacturing defects under normal use and service for a period of one (1) year from the date of purchase. This warranty is extended only to the original purchaser.

Royal's obligations under this warranty are limited to repair or replacement, at Royal's option, of products or parts found to be defective, provided that such products were properly installed and used in accordance with instructions. Royal reserves the right to make such inspections as may be necessary in order to determine the cause of the defect. Royal will not charge for labor or parts in connection with warranty repairs or replacements. Royal is not responsible for the cost of removal, return and/or reinstallation of products.

- 2) This warranty does not apply to the following items:

- a. Damage or loss sustained in a natural calamity such as fire, earthquake, flood, thunder and/or electrical storm, etc.
- b. Damage or loss resulting from any unreasonable use, misuse, abuse, negligence, or improper maintenance of the product.
- c. Damage or loss resulting from removal, improper repair, or modification of the product.
- d. Damage or loss resulting from sediments or foreign matter contained in a water system.
- e. Damage or loss resulting from improper installation or from installation of a Washlet in a harsh and/or hazardous environment.

- 3) This warranty applies only to the Washlet, and not to any other items such as the toilet bowl, etc.

- 4) To obtain warranty repair service under this warranty, you must take the defective product or deliver it prepaid (shipping and handling) to an authorized ROYAL' service center or the closest authorized dealer.

- 5) In order for this limited warranty to be valid, Royal or an authorized dealer must receive the completed attached warranty registration card and your proof of purchase within 30 days of the original purchase date.

- 6) If the danger label which has been placed over the seams on the back of the bidet's main unit is broken or otherwise not intact, this limited warranty is void.

This written warranty is the only warranty made by Royal TOTO. Repair or replacement as provided under this warranty shall be the exclusive remedy available to the purchaser. Royal TOTO shall not be responsible for loss of the product or for other incidental, special or consequential damages or expenses incurred by the purchaser, or for labor or other costs due to installation or removal, or costs of repairs by others, or for any other expense not specifically stated above. To the extent permitted by law, Royal TOTO disclaims all other implied warranties including that of merchantability and fitness for a particular purpose. Royal TOTO disclaims any liability for special, incidental, or consequential damages. Some states do not allow limitations of how long an implied warranty lasts or the exclusion or limitation of special, incidental or consequential damages, so these limitations and exclusions may not apply to you. This warranty gives the consumer specific legal rights. You may also have other rights that vary from state to state. This warranty is to the original purchaser only, and excludes product damage due to installation error, product abuse, or product misuse, whether performed by a contractor, service company, or the consumer.

Warning !

Royal TOTO shall not be responsible or liable for any failure of, or damage to, this plumbing product or product components caused by either chloramines in the treatment of public water supply or cleaners containing chlorine (calcium hypochlorite).

Note :

The use of a high concentrate of chlorine or chlorine related products can seriously damage the fittings. This damage can cause leakage and serious property damage.

THIS IS OUR EXCLUSIVE WRITTEN WARRANTY.
